

Dear Sir or Madam,

We are pleased to give our highest endorsement to Lab Accreditation Consultants, Inc of Chillicothe, Ohio. They were instrumental in preparing one of our dermatopathology laboratories in Florida for its first College of American Pathologists inspection. They were comprehensive and detailed in their approach and discussed all the nuances of the upcoming laboratory inspection. The president, Dr. Santi Kommareddi, went over every single item of the checklist and reviewed our laboratory for any deficiencies and instructed us in the best, most cost effective way to increase our quality and efficiency. She even wrote some of the policies for us. The overall cost of the consultation services was extremely reasonable for what we received in guidance and assistance. The outcome was perfect. We received no deficiencies and one of the CAP inspectors wrote at the end of a "nit-picking" inspection that "This is an excellent lab!" We have Laboratory Accreditation Consultants to thank for that. The service was professional and we found Dr. Kommareddi's knowledge of laboratory inspections to be superior. We will undoubtedly use their services again.

Sincerely,

Valerie Ray, MD FCAP
Medical Director
